## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by McCoy  
(5,009,467).

McCoy discloses an adjustable armrest for a chair comprising a U-shaped member 29/30 having a central section and a pair of ends 28. Each end has apertures 38 and 39 extending there through allowing the fasteners 41 to rotate or pivot. A guide plate 32 is coupled to the central section and has a mounting section including a pair of guide slots 35 that are perpendicular to the U-shaped member. The guide plate is fixedly coupled to the U-shaped member via fasteners 36 and 37. McCoy also discloses a back support bar 19 having first and second ends. The first end of the support bar is coupled to the chair, specifically the backrest 18 and the second end of the support bar 19 is coupled to the guide plate and guide slots. As seen in Figure 1, the support bar is coupled to the inner guide slots between the fasteners 36 and 37.

### *Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kurtz (6,109,694), Unwalla (5,660,439), Schultz (5,582,460), Aaras et al. (4,277,102) and Holbrook et al. (2002/0190555) all show various features of the claimed invention.
